

**MADE IN
GERMANY**

Toaster merido³ selected design

Details

- elongated slot toaster for 2 slices of toast
- thermal insulated housing with aluminum panels
- integrated bread and roll rack
- memory function of the toasting degree
- toasting degree with LED indication
- automatic toast food centering
- defrosting function
- reheating function
- automatic switch-off function when toast is jammed
- separate stop button to interrupt toasting
- crumb tray
- warranty: 2 years*
- product made in Germany

Technical features

- 220-240 Volt, 850-1.000 Watt
- TÜV-Rheinland / GS, protection class 1, CE
- width 38.5 cm height 20.0 cm depth 9.0 cm
- weight: 2.7 kg

Item-No. / GTIN

630.073 / 40 04822 63073 1

PU / PU-GTIN

2 / 40 04822 00112 8

Subject to change without notice.

*The 2-year manufacturer's warranty applies to all devices sold within the European Union. Your legal warranty claims according to § 437 ff. BGB (German Civil Code) remain unaffected by this regulation. You can view the warranty conditions at <https://www.ritterwerk.de/warranty>.

Toaster merido³ probably the slimmest toaster in the world

With a depth of shortly 9 cm, the elegant merido³ elongated slot toaster is incomparably slim-line and a real eye-catcher in any kitchen. The high-quality housing made of aluminium also gives the toaster an exclusive appearance. High-quality materials and perfect craftsmanship guarantee that the merido³ will have a long life span.

With merido³, two slices of toast can be toasted at the same time, with the toast food centering device ensuring that they are evenly browned. There are nine toasting degrees to brown the bread to your taste. The toasting degree is digitally displayed in LEDs and is retained for next time by means of a memory function so it does not always need resetting – this is also the case if the toaster is disconnected from the main supply. While the bread is toasting, the LEDs gradually disappear as the time progresses, so that the remaining time to toast can be easily predicted.

The toaster has other useful functions: If the toast is not served immediately, it can be easily reheated in 30 seconds using the reheating function without having to toast it again, therefore avoiding a darker shade of toast than you wanted. Frozen slices of bread are no problem for merido³ either, as it has a separate thawing function which will first thaw the bread and then toast it in a single step.

With the integrated bread and roll rack, there's nothing standing in the way of a cosy breakfast with the smell of freshly crisped up bread rolls and croissants. As the bread and roll rack is integrated into the toaster, it does not have to be stored separately and as such inadvertently lost. It is always ready to use: simply slide up, crisp up and enjoy breakfast.

The crumb tray of merido³ is perfectly and inconspicuously integrated into the elegant design and can be quickly and easily removed for cleaning.

merido³ has many practical functions and also guarantees completely safe toasting: The thermal insulation counteracts excessive heat developing in the external housing, protecting users from burns. The toaster is fully and automatically switched off after the bread has been toasted to the pre-set level – this is also the case if the bread gets stuck. If necessary, the toasting cycle can be interrupted at any point with a separate stop button. The illuminated LED display also ensures more safety because it visually shows that the toaster is in use.

The merido³ is like all other ritter-products of course “made in Germany”.
