# Cordless hand blender vertico<sup>7</sup>

- cordless, battery-operated hand blender
- full metal construction
- LED battery level indicator
- three speed settings
- two-finger switch-on safety system
- automatic safety shut-off in case of overloading or overheating
- universal cutter made of stainless steel: used to blend most foods
- blending cup made of plastic

– further colours: black, red, gold, light gold, light brown, dark brown

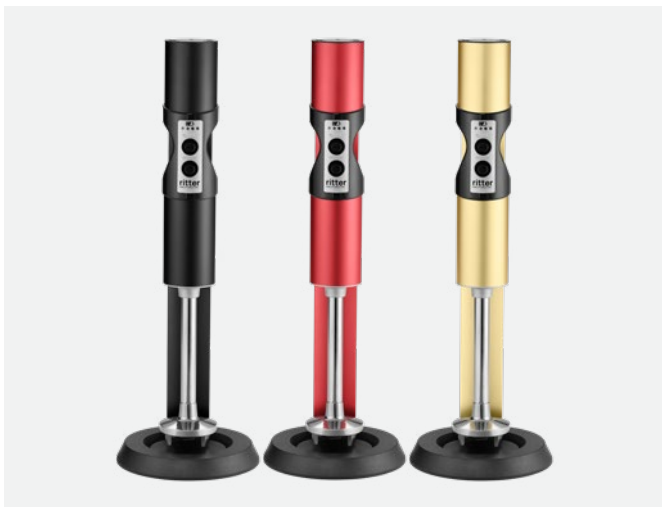

plug-in power supply unit for charging station: input voltage 100 – 240 V, lithium-ion-battery: 7.2 V, 2.1 Ah, TÜV-Rheinland/GS, CE

# Cordless hand blender vertico<sup>7</sup> Plus

- cordless, battery-operated hand blender
- full metal construction
- LED battery level indicator
- three speed settings
- two-finger switch-on safety system
- automatic safety shut-off in case of overloading or overheating
- four attachments made of stainless steel:
  - universal cutter: used to blend most foods
  - cutting knife: suited for the cutting of meat and fibrous fruits and vegetables
  - whipping disk: used to whip creamy or fluffy foods
  - stirring disk: suited to stir foods with a thick, creamy consistency
- blending cup made of stainless steel, blending cup made of plastic
- further colours: black, red, gold, light gold, light brown, dark brown

plug-in power supply unit for charging station: input voltage 100 – 240 V, lithium-ion-battery: 7.2 V, 2.1 Ah, TÜV-Rheinland/GS, CE

# Coffee machine cafena<sup>5</sup>

- coffee machine for 8 cups à 125 ml
- filter size 4
- housing made of high-quality plastic
- thermal jug with shatter-proof stainless steel vacuum cylinder
- thermal jug with an extended heat-keeping function can also be used as a serving jug
- rotatable and removable filter holder with drip stop and overflow protection
- energy-saving eco brewing process: boiler is located right underneath the water tank, which leads to reduced temperature losses
- automatic switch-off after the brewing process
- 0-watt standby mode
- automatic calcification stop function: device switches off automatically in the event of calcification
- illuminated eco switch
- five rubber feet to prevent slipping

220 – 240 V, 650 – 800 W, VDE/GS, safety category 1, CE

GTIN-Code	item no.	PU / pcs. per pallet	colour	(WxHxD) in cm	Weight

# Kettle cavita<sup>5</sup>

- cordless kettle with 360° rotating base
- heat-resistant acrylic housing
- double-sided water level indicator
- safety lid with lock mechanism
- removable lime-scale filter
- covered heating element with stainless steel protector plate
- cord storage in the base with two cord exits
- four rubber feet to prevent slipping
- 70°, 80°, 95° and 100°C temperature settings with LED indicator
- overheating protection with automatic switch-off when the set temperature is reached
- boil-dry protection with automatic switch-off when kettle is empty
- automatic switch-off when kettle is removed from base
- 1.1 l capacity

# Accessories food slicer

## Circular blades for the food slicers

The slicing result highly depends on the polish, the shaping and the quality of the circular blade. Therefore, ritter does offer a variety of circular blades with different slicing features for perfect slicing. The serrated circular blade is well suited for all kinds of slicing. The smooth ham- and sausage circular blade does evenly cut off thin slices from soft food in particular.

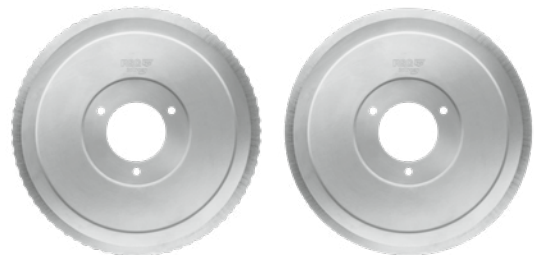

### Circular blade made of stainless steel

The regular standard circular blade is suited for every-day use. The circular blade made of stainless steel is available as serrated circular blade and as smooth ham- and sausage circular blade.

### Circular blade made of stainless steel with electropolished surface

The circular blade made of stainless steel has been polished electrolytically by a special procedure, resulting in an extremely smooth surface and even slicing edge. Thus, the slicing results get even more precise and the circular blade may be cleaned more easily. And in addition, the circular blade gains an elegant look of high polish. The electropolished circular blade is available as serrated circular blade and smooth ham- and sausage circular blade.

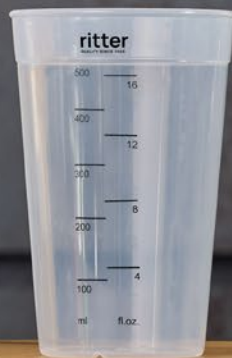

### Original ritter maintenance grease

The original ritter maintenance grease is suitable for all ritter food slicers. We recommend to occasionally regrease the gear wheels on the circular blade and the guiding of the slicing carriage.

For accessories and spare parts please see: [www.ritterwerk.com](http://www.ritterwerk.com)

# Accessories hand blender

## Hand blender attachments

The hand blender allows chopping, blending, whipping and mixing of many different food items. Depending on the desired result and consistency of the food items, ritter offers different attachments.

### Universal cutter

This multi-purpose knife is suitable to chop and blend most food items.

### Cutting knife

The cutting knife is especially suited for the cutting of meat and fibrous fruits and vegetables such as asparagus, spinach or pineapple.

### Whipping disk

The whipping disk is used to whip creamy or fluffy food items such as cream or egg whites.

### Stirring disk

The stirring disk is suited to stir food items with a thick, creamy consistency such as mayonnaise, sauces or mashes.

### Blending cup made of plastic

Thanks to its tall, narrow shape, the blending cup is perfect for food processing with the cordless hand blenders by ritter. The filling capacity is 500 ml.

### Blending cup made of stainless steel

The stainless steel blending cup is also well-shaped and therefore optimally suited for use with a ritter hand blender. Thanks to the stamped scale, you have a perfect view of when the maximum fill level of 500 ml has been reached.

2008

## The history

**ritterwerk** was founded in 1905 by Franz Ritter and is a traditional Bavarian company based in Gröbenzell near Munich. As a German manufacturer of kitchen appliances, we have devoted ourselves to the principles and teachings of the Bauhaus of the 1920s. Therefore, we manufacture products whose forms always follow their functions.

**The corner stone of today's success story** was laid by means of knife cleaning machines, which at times, when stainless steel still needed to be invented, were quite popular. With this appliance, one was able to free knives and other cutlery that were not yet stainless quite easily of rust, with just a simple crank motion. Until the introduction of stainless steel, the knife-cleaning machine was sold more than 1.000.000 times; but also the other kitchen appliances by ritter that were created in years to follow enjoyed great popularity and some still do so today.

**The first bread slicer** by ritter was developed almost 30 years after the knife-cleaning machine was first introduced to the market. As with the knife-cleaning machine, the hand crank was also used here – with great success. In 1968, the first electric food slicer followed which, true to the Bauhaus principles of the 1920s, was also designed for the kitchen drawer.

**The tradition of food slicing** with ritter products ranges from the bread slicing machine with the long-serving hand crank and the electric drive to the suspended, inclined food slicer and the one that is integrated into the kitchen drawer. The product range has been continuously expanded over the years; now we offer toasters, coffee machines, kettles, hand blenders and a wide range of builtin systems. The technical refinements as well as the ingenuity regarding the design have been developed and adapted to today's expertise. Our roots and our endeavour to produce sustainable and durable kitchen appliances that are "made in Germany" and facilitate everyday life are still an important part of our corporate culture. Our selected design is a special range of small kitchen utensils that are outstandingly designed – and reflect our vision perfectly.

**An important step** was taken at the end of 2020 when the Schüller family took over ritterwerk by way of a management buyout following the departure of Werner Braun – thus, the company remains in private hands, the succession has been arranged and the course for a successful future has been set as well. Michael Schüller, who has been Managing Director since 2005, commented on the change with optimism: „We hope that the new ownership structure will enable us to further consolidate ritterwerk's position as an expert in small kitchen appliances. In doing so, we are relying on our entire workforce and are pleased that they support our takeover 100 %." The two sons, Moritz Sebastian and Leonard Lorin Schüller, are both working on site.
